Commentaries on individual or linked records

Adams CE (2009). James Crichton Browne and controlled evaluation of drug treatment for mental illness.

Andersen L (2005). Jansen's 1910 use of a single blind experiment to assess the effects of radioactive water on rheumatic diseases.

Armitage P (2002). Randomisation and alternation: a note on Diehl et al.

Armitage P (2009). A note on the statistical analysis of the 1948 MRC streptomycin trial

Bastian H (2004). Down and almost out in Scotland: George Orwell, tuberculosis and getting streptomycin in 1948.

Boylston AW (2008). Did clinical science begin in 1767?

Boylston AW (2010). Thomas Nettleton and the dawn of quantitative assessments of the effects of medical interventions

Boylston AW, Williams AE (2008). Zabdiel Boylston's evaluation of inoculation against smallpox.

Bracken MB (2010). Why animal studies are often poor predictors of human reactions to exposure.

Chalmers I (2002). MRC Therapeutic Trials Committee's report on serum treatment of lobar pneumonia, BMJ 1934.

Chalmers I (2006). Joseph Asbury Bell and the birth of randomized trials.

Chalmers I (2010). Why the 1948 MRC trial of streptomycin for pulmonary tuberculosis used treatment allocation based on random numbers

Chalmers I, Clarke M (2002). J Guy Scadding and the move from alternation to randomization.

Chalmers I, Toth B (2009). 19th century controlled trials to test whether belladonna prevents scarlet fever.

Clarke M (2004). The 1944 patulin trial of the British Medical Research Council: an example of how concerted common purpose can get reliable answers to important questions very quickly.

Cochrane AL, Blythe M (2004). Salonica. One Man's Medicine: an autobiography of Professor Archie Cochrane.

Cox DR (2009). Randomization for concealment.

Davey Smith G (2006). Capitalising on Mendelian randomisation to assess the effects of treatments.

Dean ME (2003). The homeopathic mustard gas trials of 1941–42.

Dean ME (2003). 'An innocent deception': placebo controls in the St Petersburg homeopathy trial, 1829-30.

Dean ME (2009). Comparative evaluation of homeopathy and allopathy within the Parisian hospital system, 1849-51.

Diaz M, Neuhauser D (2004). Lessons from using randomization to assess gold treatment for tuberculosis.

Doll R (2003). Controlled trials testing two or more treatments simultaneously.

Donaldson IML (2004). Ambroise Paré's account in the *Oeuvres* of 1575 of new methods of treating gunshot wounds and burns.

Donaldson IML (2005). Mesmer's 1780 proposal for a controlled trial to test his method of treatment using 'Animal Magnetism'.

Donaldson IML (2008). Francis Bacon's comments on the power of negative observations in his *Novum Organum*.

Donaldson IML (2008). Lavoisier's comments on the art of drawing conclusions from experiments.

Elwood P (2004). The first randomized trial of aspirin for heart attack and the advent of systematic overviews of trials.

Furberg CD (2009). How should one analyse and interpret clinical trials in which patients don't take the

treatments assigned to them?

[Gluud C, Hilden J \(2008\)](#). Povl Heiberg's 1897 methodological study on the statistical method as an aid in therapeutic trials.

[Gøtzsche P \(2004\)](#). Niels Finsen's treatment for lupus vulgaris.

[Gong Y, Gluud C \(2003\)](#). Commentary on the Ben Cao Tu Jing (Atlas of Materia Medica), 11th century.

[Hampton J \(2004\)](#). An early parallel group trial in cardiology.

[Hemminki E \(2005\)](#). Commentary on an early placebo controlled trial in Finland.

[Houston C \(2004\)](#). Ferguson's BCG research - Canada's first randomized clinical trial?

[Huth EJ \(2005\)](#). Quantitative evidence for judgments on the efficacy of inoculation for the prevention of smallpox: England and New England in the 1700s.

[Huth EJ \(2006\)](#). Transatlantic ideas on the philosophy of therapeutics in the middle of the 19th century.

[Huth EJ \(2006\)](#). Jules Gavarret's *Principes Généraux de Statistique Médicale*: a pioneering text on the statistical analysis of the results of treatments.

[Huth EJ \(2008\)](#). The move toward setting scientific standards for the content of medical review articles.

[Hyttén F \(2009\)](#). Isabella Isabella Leitch's contributions to the development of systematic reviews of research evidence

[Jefferson T \(2006\)](#). Why the MRC randomized trials of whooping cough (pertussis) vaccines remain important 40 years after they were done.

[Josse NP, Pormann PE \(2008\)](#). Archery, mathematics, and conceptualising inaccuracies in medicine in 13th century Iraq and Syria.

[Kaptchuk T \(2004\)](#). Early use of blind assessment in a homeopathic scientific experiment.

[Kerr CE, Milne I, Kaptchuk TJ \(2007\)](#). William Cullen and a missing mind-body link in the early history of placebos.

[Klar N, Donner A \(2002\)](#). The impact of E.F. Lindquist's text "Statistical Analysis in Educational Research" on cluster randomization.

[Lee MR \(2004\)](#). The miracle of St. Alfege's: seventy years on.

[Loudon I \(2002\)](#). Ignaz Phillip Semmelweis' studies of death in childbirth.

[Loudon I \(2002\)](#). The use of historical controls and concurrent controls to assess the effects of sulphonamides, 1936-1945.

[Loudon I \(2002\)](#). An early Medical Research Council controlled trial of vitamins for preventing infection.

[Louis-Courvoisier M \(2007\)](#). An 18th century controlled trial prompted by a shortage of hospital beds.

[Löwy I \(2010\)](#). Martin Arrowsmith's clinical trial: scientific precision and heroic medicine.

[McPherson K, Bunker JP \(2006\)](#). *Costs, risks and benefits of surgery*: a milestone in the development of health services research.

[Mann H, Djulbegovic B \(2004\)](#). Why comparisons must address genuine uncertainties.

[Marks HM \(2006\)](#). The Kendrick-Eldering-(Frost) pertussis vaccine field trial.

[Marks HM \(2007\)](#). James Angus Doull and the well-controlled common cold.

[Middleton J \(2008\)](#). Pellagra and the blues song '*Cornbread, meat and black molasses*'.

[Milne I, Chalmers I \(2002\)](#). Hamilton's report of a controlled trial of bloodletting, 1816.

[Moore W \(2009\)](#). John Hunter: learning from natural experiments, 'placebos', and the state of mind of a patient in the 18th century.

[Morabia A \(2004\)](#). Pierre-Charles-Alexandre Louis and the evaluation of bloodletting.

[Morabia A \(2006\)](#). Joseph Goldberger's research on the prevention of pellagra.

[Morabia A \(2007\)](#). Claude Bernard, statistics, and comparative trials.

[Morabia A \(2010\)](#). Edward Jenner's 1798 report of challenge experiments demonstrating the protective effects of cowpox against smallpox.

[Nasser M, Tibi A \(2006\)](#). Ibn Hindu and the science of medicine.

[Nasser M, Tibi A, Savage-Smith E \(2007\)](#). Ibn Sina's *Canon of Medicine*: 11th century rules for assessing the effects of drugs.

- [Neuhauser D, Diaz M \(2007\)](#). Use of rotation to allocate patients to homeopathic or regular medical services in Cook County Hospital, Chicago, 1882.
- [Neuhauser D, Diaz M, Chalmers I \(2007\)](#). A puzzling omission in a great medical textbook edited by a pioneer of controlled trials.
- [Nunn JF \(2008\)](#). A treatment that has stood the test of time for over three and a half millennia.
- [Olsen SF \(2002\)](#). The People's League of Health trial.
- [Podolsky SH \(2008\)](#). Jesse Bullowa, specific treatment for pneumonia, and the development of the controlled clinical trial.
- [Pollock JI \(2003\)](#). A controlled trial using a factorial design reported in 1946.
- [Pollock JI \(2005\)](#). Two controlled trials of supplementary feeding of school children in the 1920s.
- [Rennie D, Chalmers I \(2009\)](#). Exposing the dangers to patients of medical reviews and textbooks which ignore scientific principles.
- [Senn SJ \(2003\)](#). Cushny and Peebles and optical isomers, 1905.
- [Shannon H \(2008\)](#). A statistical note on Karl Pearson's 1904 meta-analysis.
- [Sinclair L \(2007\)](#). Recognising, treating and understanding pernicious anaemia.
- [Stolberg M \(2006\)](#). Inventing the randomized double-blind trial: The Nuremberg salt test of 1835.
- [Stoll S \(2004\)](#). Paul Martini's 'Methodology of therapeutic investigation', 1932.
- [Stylianou C, Kelnar C \(2008\)](#). The introduction of successful treatment of diabetes mellitus with insulin.
- [Sutton G \(2004\)](#). James Lind aboard Salisbury.
- [Thacker SB \(2009\)](#). How I came to write papers for clinicians in the late 1980s about improving the quality of reviews.
- [Tibi S \(2005\)](#). Al-Razi and Islamic medicine in the 9th Century.
- [Tröhler U \(2003\)](#). Cheselden's 1740 presentation of data on age-specific mortality after lithotomy.
- [Tröhler U \(2003\)](#). Lind and scurvy: 1747 to 1795.
- [Tröhler U \(2003\)](#). James Lind and the evaluation of clinical practice.
- [Tröhler U \(2003\)](#). James Lind at Haslar Hospital 1758-1774: a methodological theorist.
- [Tröhler U \(2003\)](#). John Clark 1780 & 1792: learning from properly kept records.
- [Tröhler U \(2003\)](#). Edward Alanson 1782: responsibility in surgical innovation.
- [Tröhler U \(2003\)](#). Withering's 1785 appeal for caution when reporting on a new medicine.
- [Tröhler U \(2003\)](#). MacLean 1818: comparing like with like and recognising ethical double standards in therapeutic experimentation.
- [Tröhler U \(2007\)](#). An early 18th century proposal for improving medicine by tabulating and analysing practice.
- [Tröhler U \(2010\)](#). Towards endocrinology: Theodor Kocher's 1883 account of the unexpected effects of total ablation of the thyroid.
- [Vandenbroucke JP \(2003\)](#). Adolphe Vorderman's 1897 study of beriberi among prison inmates in the Dutch East Indies: an exemplar of scrupulous efforts to avoid bias.
- [Vandenbroucke JP \(2003\)](#). The contribution of William Fletcher's 1907 report to finding a cause and cure for beriberi.
- [Vandenbroucke JP \(2003\)](#). Thalidomide: an unanticipated adverse effect.
- [Vandenbroucke JP \(2003\)](#). Aspirin: an unanticipated beneficial effect.
- [Volmink J \(2005\)](#). The willow as a Hottentot (Khoikhoi) remedy for rheumatic fever.
- [Weingarten S \(2003\)](#). Food in Daniel 1:1-16: the first controlled experiment?
- [Wessely S \(2009\)](#). Surgery for the treatment of mental illness: the need to test untested theories.
- [Williams KJ](#). The introduction of chemotherapy with arsphenamine - the first magic bullet
